

## Sodium Thiosulphate Pentahydrate Of Purity 99%

Sodium Thiosulphate Pentahydrate Of Purity 99% is typically used in Ballast Water Management system to neutralize the excess chlorine/oxidant residual for ballast water discharge compliance. It's a critical consumable for ballast water management system.

### DIRECTIONS FOR USE

Transfer the product into the Ballast Water Dechlorination Chemical tank.

Note: Please, advise and follow the existing guideline from your ballast water treatment system on the operation.

Code: 161163313

### Sodium Thiosulphate Pentahydrate Of Purity 99%

is one of the major preferred neutraliser for ballast water management system

#### Features

- Sodium Thiosulphate Pentahydrate Solid Form
- Readily soluble in water
- Supply in 25 kg bag ( USA 23 kg bag)

#### Benefits

- Neutralize excess chlorine/oxidant
- Applied with Ballast Water Management System for Discharge water compliance (IMO & USCG)

#### PRODUCT CHARACTERISTICS

Appearance: Crystal Form  
Density [g/ml]: 1.75

#### TECHNICAL DATA

Purity: 99%
